MeasurePro Software

API's MeasurePro software is the complete metrology software, capable of controlling 9D LADAR, Radian, i360, Industrial Robots, and other elements of the Quality Control department from one location to reduce manhours and increase throughput. MeasurePro handles 90% of the tasks required by metrology users and is included with all API product purchases. This single simulation environment includes an easy-to-use interface and runs on Windows 10 & 11 operating systems.

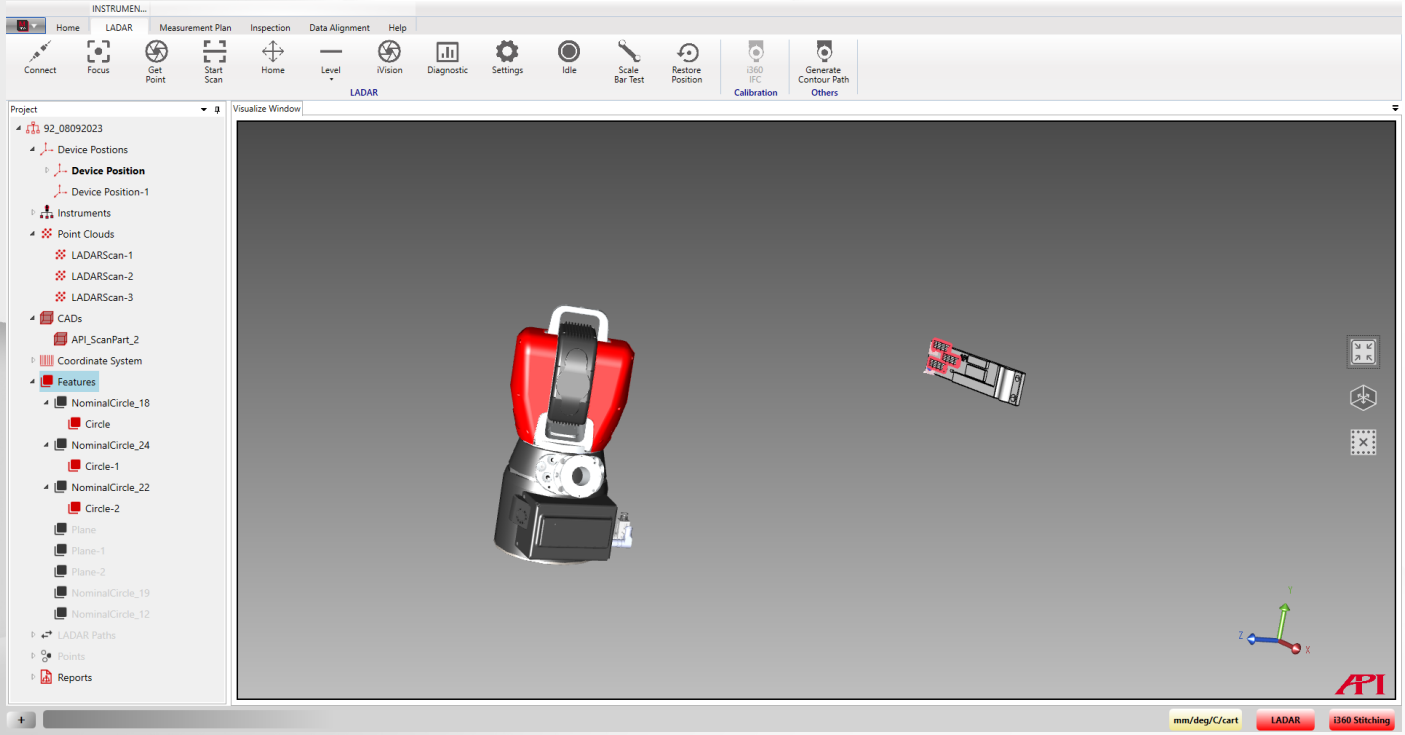

API Accessories Compatibility

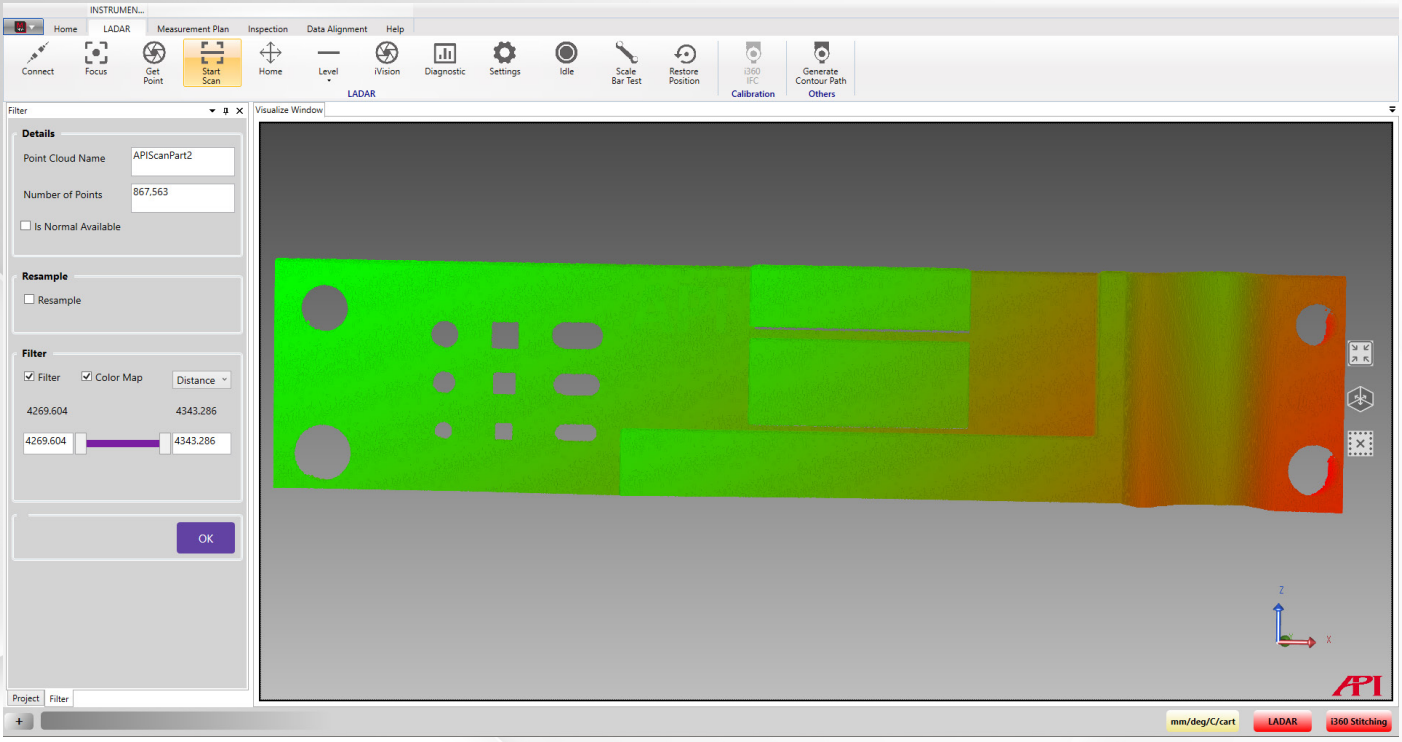

- vProbe
- iScan
- SmartTrack Sensor (STS)
- Active Target
- Can also control robots such as Staubli, KUKA and Fanuc (partially) for the automation cells.

MeasurePro Applications

- Inspect parts to CAD
- Build
- Analyze data
- Report
- Allows automation between API products and common inspection cells.
